

# Estuarine & Coastal Sciences Association

*An international organisation dedicated to the scientific study & management of estuarine and coastal environments*

ECSA provides an international platform and forum for those interested in all aspects of the science, management and sustainable use of estuarine, coastal and marine environments.

ECSA membership covers a very wide spectrum of activities and interests and can be for individuals as well as institutes. Whether you are starting your career or a leader in your field, you will benefit from ECSA membership.

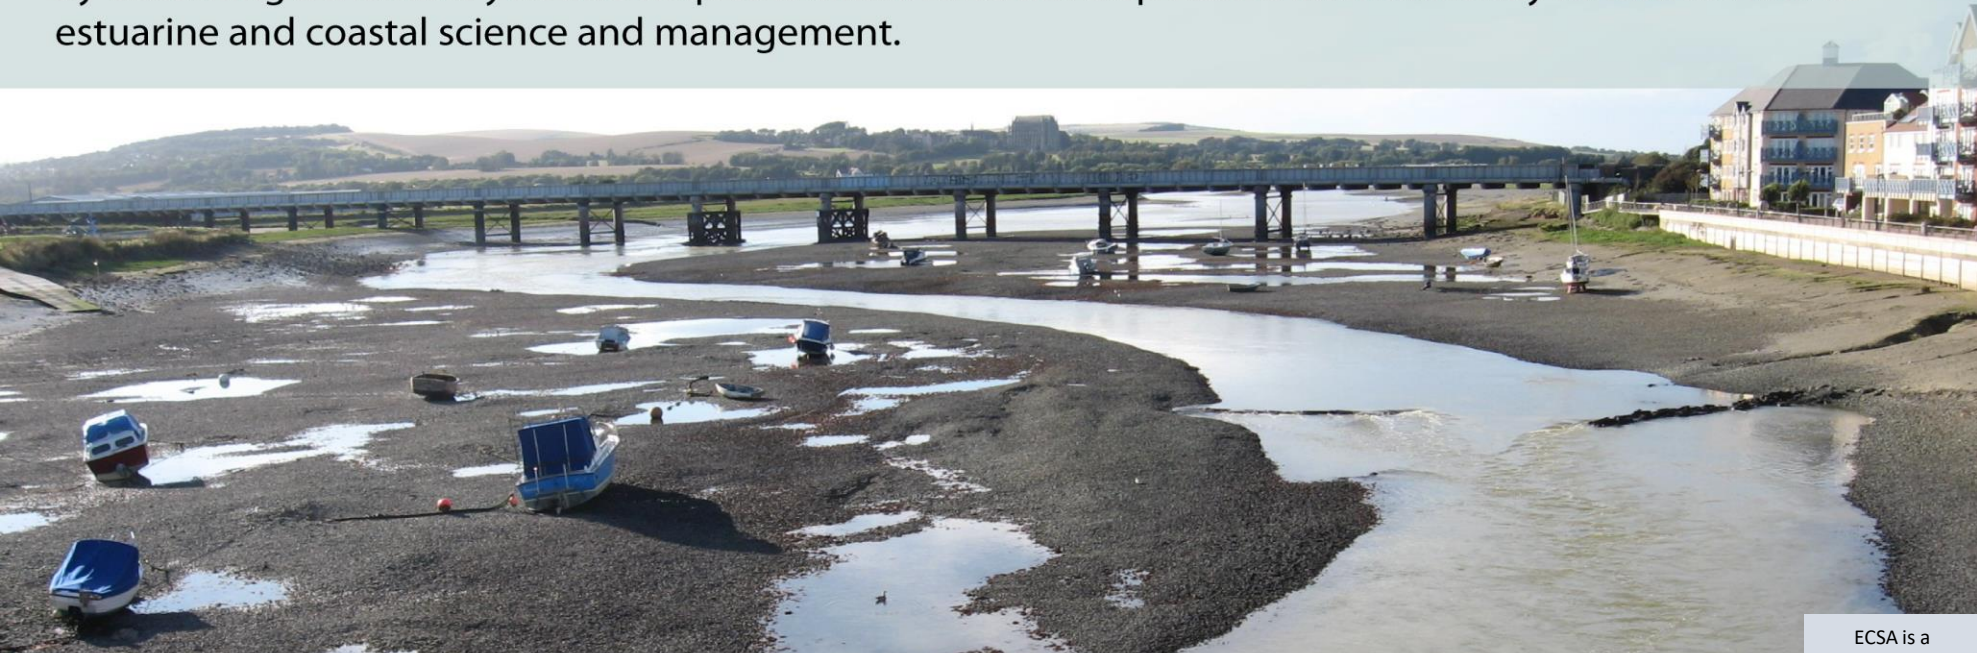

The key is networking. Through ECSA you can link to those with common interests, engage with multidisciplinary groups, and develop new opportunities, research ideas and collaborations as well as see career opportunities.

As an ECSA member you will benefit from:

- Exclusive access to ECSA grants.
- Discounted registration fees for regularly organised ECSA events including:
  - International conferences
  - Local meetings
  - Specialist workshops
- ECSA Bulletin twice yearly and the e-newsletter thrice yearly
- Discounted subscription to the journal Estuarine, Coastal and Shelf Science

ECSA is a registered charity established in 1971 and run by a Council of internationally-renowned estuarine and coastal scientists and managers.

By becoming a member you also help to maintain and develop ECSA's internationally renowned role in estuarine and coastal science and management.
